

TELEMATICS FOR A GREENER FUTURE

Advanced Insights for Electric Vehicles

We provide critical data and business intelligence to help fleets achieve greater sustainability. Our telematics device, combined with the EasyTrak Solutions open-platform provides vehicle status data from all vehicle types.

Benefits of Telematics for Green Fleets:

- Capture rich vehicle data
- Measure CO2 emissions
- Manage travel time
- Monitor vehicle diagnostics
- Predict possible vehicle breakdowns
- Optimise asset utilisation
- Increase productivity, efficiency, safety

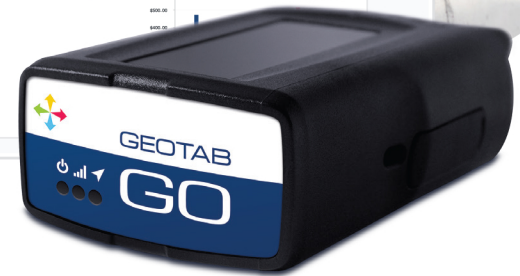

Power up your Fleet with EasyTrak!

In addition to conventional petrol and diesel vehicles, our platform supports hybrid and electric vehicles, as well as alternative and advanced fuel technologies such as CNG, LPG and Hydrogen. Analyse your fleet and achieve greater sustainability by switching to a hybrid or electric vehicle!
